MOTIVATED SELLER!

1119 King Street is a charming 1930's craftsman style home located in one of the most desirable areas in downtown Charleston. Just down the road from Wagener Terrace, Hampton Park, and numerous shops and restaurants. You'll appreciate how well the integrity of this home has been maintained and preserved. The home features original hardwood floors, two fireplaces, exposed brick, and a tankless hot water heater. The kitchen was recently updated with new appliances, butcher block countertops, and gorgeous pressed metal ceiling tiles. The first floor features a large family room, dining area, laundry room and a full bath. Upstairs you will find three large bedrooms and a full bath. The spacious master suite has a fireplace, a large walk-in closet, and a flex space that's perfectly sized for an office or nursery. The home also features a large front porch, off-street parking, and a huge backyard, perfect for entertaining guests or giving kids room to play. If you choose, there's plenty of room to do all of the above and still have space to build a detached garage. Schedule your showing today!
