Mount Pleasant, SC 29464

This one-of-a-kind unique elevated log home has all the upgrades that you can imagine. To begin with the home sits on approximately one acre, which is located at the end of a Cul-de-sac. This property features landscape lighting and irrigation system. Once you enter the home, you will find a very warm and inviting entrance way which leads into a grand living room with a high A-framed beamed ceiling and a very large picture window, double fans, and gleaming pine floors and gas fire place. To the left of living room is a separate dining room which is located off of the gourmet kitchen.
