

This home has the wow factor going on!

Privacy that you rarely find these days and is in turn key shape. Nothing to be done!! These owners have made every repair and update that I don't have room to list them all but I have an attachment that lists improvements that have been done to include whole house plumbing repipe 2012, R-30 insulation added 2012, tankless water heater added 2012, outdoor speaker wiring, gas logs, new pool liner 2011, Levolar premium wooden blinds 2011 just to mention a few. The master bedroom and bathroom suite is awesome and HUGE. The kitchen is a Chef's Kitchen and the yard is a landscapers dream. Neighborhood has a dock right on the Ashley River for great fishing, crabbing, etc. Please look at the pictures and I promise you will fall in love. The lot is larger than it appears during showing because an area has been left natural. Please ask to see plat. Also there is approximately .75 acres for purchase between this house and the tennis courts for a reasonable price which would certainly make this property "estate" size!
