

Former Arkansas Governor Mike Huckabee on Healthcare

Here are the Governor's Views on Healthcare

- The health care system in this country is irrevocably broken, in part because it is only a "health care" system, not a "health" system.
- We don't need universal health care mandated by federal edict.
- We do need to get serious about preventive health care.
- I advocate policies that will encourage the private sector to seek innovative ways to bring down costs.
- I value the states' role as laboratories for new market-based approaches.
- When I'm President, Americans will have more control of their health care options, not less.
- As President, I will work with the private sector, Congress, health care providers, and other concerned parties to lead a complete overhaul of our health care system.
- Our health care system is making our businesses non-competitive in the global economy. It is time to recognize that jobs don't need health care, people do, and move from employer-based to consumer-based health care.
