You will love living here!!! This home has been very well taken care of and it shows! Many nice NEW features. New decking in the backyard with a very nice painted finish just off the screened porch that also has fresh paint all around. The M bedroom is downstairs and has a large walk in closet, tray ceiling, bath with double sink vanity, separate garden tub and shower and tiled floor. The great room has soaring ceilings with loads of natural light and a gas log fireplace. Wood floors in all of downstairs. The HVAC is less than 2 years old as are most of the appliances. Termite bond in place. Shop/Shed is new. Very nice! This is a very popular subdivision with friendly neighbors and prime location! No flood ins Required. Minutes to beaches and Historic Charleston, Huge park with water park and dog park!
